Pgrigg.dev landing page/about page copy

Hi, I'm Phil, originally from the UK and now living in the US.

This is my website. Not so much a practical example of a single page layout but an experiment in building an interactive and engaging multi-page website on just one page.

This site has four slides: About, Projects, Skills and a Contact page. As you may have figured, you press the 'Next →' button to go to a new slide and can go back by pressing the '←' button. But if that seems like a lot of bother, feel free to press the 'Right Arrow' or 'N' keys to go forward and the 'Left Arrow' or 'P' keys to go back.
Hope you enjoy!

More About Me
Back as a boy of 19, dyslexic with a deep fear of exams, I put my logical brain into low power mode and fully embraced my starving artist side to do a Bachelor's degree in Digital Film and Screen Arts.
In becoming a web developer, I have put my logical brain back on 3 square meals a day and a full workout plan (never skipping coding problems day) and have remembered what I never really forgot, how much fun problem solving can be.
With an eagerness to learn and a work ethic built with experience, I must fall into cliche and say I am a web developer who has a passion for the visual side of Front-End Development but equally loves The Logical Challenges that are unique to working with Code.
